

## #2 Sample Letter to Legislator Opposing A8378 and Requesting a Town Hall

Dear Assemblyman/Senator XXXX,

I am writing to you to see if you can sponsor and hold a meeting regarding mandating Covid 19 vaccinations to children ages 2-18 to attend schools.

It has come to my attention that Sen. Brad Hoylman and Assemblyman Jeff Dinowitz are collaborating again by introducing legislation that would mandate these vaccinations to very young children to attend schools in NYS. This mandate includes not only public schools but all private and religious schools as well. It is important to note that these "legislators/statesmen" mandated all vaccines on the suggested "Childhood Immunization Schedule" back in 2019 and eliminated the Religious Exemption that same year.

These vaccines are not what they were sold to be! By looking at the VAERS reports and listening to anecdotes from regular folks... there is much to be very disturbed about. I will not get into all the specifics here in my letter because it would take too long, but the evidence is out there. These "vaccines" are not what they appear to be. People are bombarded daily with the wonders of these vaccines. But there is much fear generated by them and clear video evidence. People are bribed with almost everything to get vaccinated, including children - from ice cream cones to \$100.00 recently in NYC. To me, when you must bribe someone to do something, it casts something that is nefarious.

While many people are waking up to the reality of what is happening, there still needs to be awareness. Our freedoms are being severely curtailed, along with our parental authority. The government is actively usurping our parental rights. Unfortunately, many people are unaware and still in the dark. I, for one, do not wish to co-parent with government officials who are not doctors. Many have vested interests in the Big Pharma industry and are making millions of people's misery. Besides the children now being targeted, their parents are losing their jobs if they refuse the vaccines. This mandate is downright criminal.

Would you be willing to arrange a Town Hall for the lower communities of \_\_\_\_\_ County and \_\_\_\_\_ County? People need to be aware of what is coming down the pipeline, and with the state of the country, folks are just trying to keep their lives going. Many do not have the time to investigate the daily CV updates because many are just trying to stay above water and provide for their family. The MSM hides facts from the public because they are nothing more than paid shrills. By having a town hall in the evening or the weekend, people could attend and learn what is taking place, and how to fight it.

I hope you will consider doing this. I remembered Assemblyman Lalor's meeting a few years ago in Fishkill regarding the original vaccine mandate. I remembered a story about a father who spoke there. He had to move his oldest daughter, a senior then in

high school to Pennsylvania, to temporarily live with his brother's family to avoid that mandate. No parent should have to go to these lengths to protect their children from something they feel would harm them. The number of homeschoolers has skyrocketed, and people are fleeing NYS in vast numbers never seen before. I am among those looking to leave this God-forsaken state. Our new governor is nothing more than a repeat of the former one - on steroids. 'My body, my choice' - sure, if you want an abortion. But if you want to protect your child from much-untested "vaccine", you can't refuse. This mandate is medical tyranny.

I have a friend who came to America as a child from Venezuela. She clearly remembers the hardships there and was on the phone with me a few weeks ago - very upset. She sees the same pattern playing out here, and she cries, "I don't want to see America die!" She lived through Communism, and she knows firsthand the evil of tyrannical government officials. She is also looking to move out of NYS.

I hope you will be open and willing to have a town hall soon. *We The People* need to spread the TRUTH about what is taking place in an environment where we can speak freely and share their ideas.

Sincerely,
