Dear Assemblyman or Assemblywoman (Name):

Thank you for co-sponsoring Bill A4269 that Prohibits a mandatory immunization against the coronavirus. I (we) am (are) grateful for your action.

I am particularly grateful that you specifically address children under 18:

NO CHILD UNDER THE AGE OF EIGHTEEN SHALL BE REQUIRED TO RECEIVE SUCH VACCINE AGAINST CORONAVIRUS UNLESS A PERSON IN A PARENTAL RELATION TO SUCH CHILD CHOOSES TO HAVE THE CHILD VACCINATED. FOR THE PURPOSE OF THIS SUBDIVISION THE TERM "PERSON IN PARENTAL RELATION TO A CHILD" SHALL MEAN AND INCLUDE ANY PERSON WHO IS A PARENT OR LEGALLY APPOINTED GUARDIAN OF A CHILD UNDER THE AGE OF EIGHTEEN.

As you know, parental (grandparent/guardian) authority in recent weeks has been challenged with mandates and campaigns to have the children from age 5 to 18 vaccinated particularly while they enjoy a 99.9% survival rate should they have the virus. (... age 5-9 .fatality rate of 0001, age 10-14 fatality rate of .001, age 15-19, fatality rate of .003. (<https://www.acsh.org/news/2020/11/18/covid-infection-fatality-rates-sex-and-age-151630> and: A CDC update Wednesday says individuals are more likely to survive the coronavirus after contracting it. The health agency says if you have the virus between the ages of 0 to 70, you have a 99% survival rate. And if you're over 70, the survival rate is nearly 95%. Source: <https://www.winknews.com/2020/09/23/cdc-shows-covid-19-has-high-survival-rate-doctor-still-wants-to-see-precautions-taken/>)

Thank you for protecting ours and our children's rights by identifying the proper authority in making health care decisions.

I am so grateful for your support.

Sincerely,
